

San Diego Forward: The 2019-2050 Regional Plan Community Based Organizations (CBO) Outreach Network

To reach out to community members who have traditionally been underserved and underrepresented in the planning process, SANDAG partnered with 13 Community Based Organizations from around the region. These organizations have created programs to engage stakeholders from low-income communities, limited-English speaking populations, the disabled community, and seniors to ensure that their voices are heard and that the 2019 Regional Plan is socially equitable.

National Latino Research Center (NLRC), Cal State San Marcos – The NLRC is committed to contributing to the knowledge and understanding of rapidly growing U.S. Latino populations through applied research, training, technical assistance, research-based services, and information exchange. Specializing in applied research, the NLRC brings together key stakeholders from the community, government, NGO sector, and private industry to identify solutions and develop strategies to address local and regional challenges. The NLRC conducts research and training in the areas of education, civic engagement, cultural competency, health, environmental issues, public policy, and community development. In addition to research projects, the NLRC provides technical assistance to a range of organizations and actively supports multi-agency collaborations that seek to leverage resources and expertise.
